

The City of Port St. Lucie to Reduce Permitting Fees

As of Monday October 5, 2009 building permit fees and plan review fees for single-family dwellings, townhomes, multifamily dwellings and most commercial permits located in the City of Port St. Lucie, will be reduced. Building permit fees are derived from the Building Valuation Data published twice a year by the International Code Council. These fees are based on square footage of the proposed construction and construction type. The next building valuation data is due in January 2010. Miscellaneous permit fees are based on the cost of processing the permit, plan review and inspection. These fees will not change at this time. On Monday, October 5, 2009 the new single-family permit fees will be programmed into the permit fee calculator available on the city website, www.cityofpsl.com. If you have any questions, please contact the building department at 772-871-5132.
